Universal pressure appliance

# **GRISOPRESS**

Pressure without effort Press system for stoppers, pouring spouts and dropper closures

Universal pressure appliance

# **GRISOPRESS**

The GRISOPRESS is a pneumatically operated machine with infinitely variable pressure for the insertion of stoppers, pouring spouts, droppers and many other types or closure.

#### TWO DIFFERENT TYPES OF GRISOPRESS ARE AVAILABLE

### GRISOPRESS-F with foot switch

The closure is placed on the container and both are pushed against the centering stop. By actuating the foot switch, the closure is pressed into the container opening at the preset pressure level. Release of the foot switch allows the closed container to be removed.

## GRISOPRESS-A with automatic release

The press cycle is initiated when the container is centered against the actuating switch. When the preset pressure is reached the container is automatically released.

	TECHNICAL DATA	
Dimensions	<ul><li>width</li></ul>	300mm
	<ul><li>depth</li></ul>	200mm
	<ul><li>height</li></ul>	530mm max.
Weight	<ul><li>approx.</li></ul>	12kg
Container dimensions	<ul><li>height</li></ul>	250mm max.
	• Ø	90mm max.
	other dimensions on request	
Press head	• Ø	50mm
	Special design on request	
Pressure	<ul> <li>infinitely variable up to 186daN at 6bar</li> </ul>	
Output	• up to 1'800 closures per hour	
Connection values	• up to 6 bar	
	air requirement per working cycle	
	at 6 bar 2	at 3 bar 1 l
